## **RADinfo SYSTEMS™ Launches DICOM Image Importing Software which follows IHE PDI and IRWF integration profile to Marketplace**

DULLES, VA --(PR NEWSWIRE)— August 2, 2006 – RIS/PACS solutions provider, RADinfo SYSTEMS, will introduce its PowerPACS Image Importer at the upcoming 2006 Veterans Affairs E-Health University meeting. This event will be held at the Gaylord Opryland Resort & Convention Center in Nashville, Tennessee August 21-23, 2006.

The PowerPACS Image Importer is RADinfo's DICOM image importing solution, which is fully compliant to IHE Portable Data for Imaging (PDI) and Import Reconciliation Workflow (IRWF) integration profile. The PowerPACS Image Importer brings cutting-edge technologies to the error-prone and sometimes time-consuming tasks of transferring external studies and integrating legacy archive systems into a facility's local PACS. Regardless of the source; patient CDs, DVDs, legacy PACS, or Structure Report, RADinfo SYSTEMS' PowerPACS Image Importer is the perfect gateway into a local workflow. With intelligent matching algorithms, PowerPACS Image Importer can automatically link incoming images to proper existing records or prompt the operator to verify the match and even edit image attributes directly. The modified attributes are kept in the original image and are totally traceable.

PowerPACS Image Importer is built to IHE's integration profiles to provide some of the latest medical image import requests in the marketplace. Aside from this current launch, the PowerPACS Image Importer technology is already being used in Veterans Affairs Medical Centers and imaging facilities throughout the country.

Dr. Chen-Tai Ma, President and CEO of RADinfo SYSTEMS commented. "Importing digital medical images effectively and securely into a PACS is one of the most challenging issues facing the healthcare industry today. Our PowerPACS Image Importer software will help alleviate that problem and provide our clients a reliable and affordable solution."

### About RADinfo SYSTEMS:

RADinfo SYSTEMS is leading the revolution towards truly affordable filmless healthcare systems. The company's products focus on empowering imaging facilities with reliable components of Radiology Information Systems (RIS), Picture Archiving and Communication Systems (PACS), and Teleradiology Systems at a fraction of the cost compared to larger competing solutions. RADinfo SYSTEMS develops and integrates DICOM and HL7 compliant software with modalities and other radiological hardware to deliver state-of-the-art solutions for hundreds of small and large healthcare providers worldwide. Professional services include software development, consultation, integration, installation and 24x7 technical supports. Delivering Solutions that Meet Your Vision™ since 1993, RADinfo SYSTEMS' headquarters is located in Dulles, VA and can be found on the web at [www.RADinfoSYSTEMS.com](http://www.RADinfoSYSTEMS.com).
