RADinfo SYSTEMS™ introduces entry-level PACS solution for growing health care facilities at the medical industry's largest international meeting.

DULLES, VA --(PR NEWSWIRE)—December 12, 2005 – RADinfo SYSTEMS Inc., a leader in affordable RIS/PACS and Teleradiology solutions, introduced their new entry-level Picture Archiving and Communication Systems (PACS) solution: Micro PowerPACS®. The company premiered the product at the Radiological Society of North America's (RSNA) Annual Meeting in Chicago, held Nov. 27 - Dec. 2, 2005. RSNA is the medical industry's largest international meeting with over 700 vendors and 62,000 attendees, including radiologists, allied health scientists, hospital executives and healthcare consultants.

“Micro PowerPACS is a compact and powerful solution for any healthcare provider looking to migrate from traditional film-based technology to digital PACS. Micro PowerPACS’ flexibility allows a facility’s last remaining analog modality to leave film in the preparation for a true DICOM archive. Micro PowerPACS enhances productivity and provides enormous improvements in patient throughput, diagnosis and treatment. It’s low price point and scalability position Micro PowerPACS as an industry leader in the entry-level PACS market enabling growing healthcare facilities to register patients, acquire, archive, view, print film, generate reports, distribute and manage DICOM images,” says Dr. Chen-Tai Ma, CEO & President of RADinfo SYSTEMS.

Micro PowerPACS’ unique and intelligent design can integrate with any vendor's DICOM modality to provide a seamless digital environment. It also supports a DICOM modality worklist to register or retrieve patient demographic information from your RIS/HIS, saving time and ultimately reducing costly human errors. Micro PowerPACS is shipped with a leading edge, user-friendly DICOM viewer enhancing image readability while providing physicians with 21st Century technology to assist them in their assessments and recommendations.

About RADinfo SYSTEMS

Since 1993 RADinfo SYSTEMS is leading the revolution towards truly affordable film-less healthcare systems. The company’s products focus on empowering imaging facilities with reliable components of Radiology Information Systems (RIS), Picture Archiving and Communication Systems (PACS), and Teleradiology Systems at a fraction of the cost compared to larger competing solutions. RADinfo SYSTEMS develops and integrates DICOM and HL-7 compliant software with modalities and other radiological hardware to deliver state-of-the-art solutions to hundreds of small and large healthcare providers worldwide. Professional services include software development, consultation, integration, installation and 24x7 technical support. RADinfo SYSTEMS’ world headquarters is located in Dulles, Virginia and can be found on the web at www.radinfosystems.com.
