RADinfo SYSTEMS Continues the Expansion of PowerPACS/RIS, an IHE Compliant PACS/RIS Solution to Support Structured Reports

New PACS/RIS hybrid solution offers brokerless PACS/RIS workflow integration

September 16, 2005 – RADinfo SYSTEMS™ Inc., a leader in affordable PACS and teleradiology solutions, announces the expansion of its PowerPACS/RIS™, the IHE compliant solution to support structured reports. This web-enabled PACS/RIS solution represents the next generation of PACS/RIS hybrid solutions developed to manage PACS/RIS workflow without the need for brokering products. This solution is completely configurable and easily scales as volume increases, insuring that it meets a customer's needs not only today but tomorrow as well. RADinfo SYSTEMS will demonstrate this technology at booth #2165 during the 2005 Radiological Society of North America (RSNA) conference in Chicago, Nov 27-Dec 2.

“We have created an affordably priced, flexible solution ideally suited for small to mid-sized healthcare providers searching for a PACS that can handle the most important RIS functions,” explains Dr. Chen-Tai Ma, CEO and President of RADinfo SYSTEMS. “There’s no longer a need for two big information systems. However, if customers are happy with their current RIS, then the modular design of PowerPACS/RIS can integrate with existing RIS systems using the IHE framework and HL7 and DICOM standards. The customers have complete control of their systems and workflow.”

“The HIPAA-compliant PowerPACS/RIS system is securely web-enabled, allowing relevant users to view relevant data at the relevant time. In addition, it is fully ready to support our upcoming structured report management system, which will also be demonstrated at this year’s RSNA. In a market of big conglomerates and merged products, PowerPACS/RIS stands out as the flexible affordable solution,” Dr. Ma added.

PowerPACS/RIS performs basic RIS workflow functions for scheduling, admitting, ordering and reporting. The solution is an evolutionary enhancement of the PowerPACS™ suite of products that offer image acquisition, distribution, viewing, printing and archiving functions. Workflow management is customized at each site according to individual client specifications.

About RADinfo SYSTEMS

RADinfo SYSTEMS is leading the revolution towards truly affordable filmless healthcare systems. The company's products focus on empowering imaging facilities with reliable components of Radiology Information Systems (RIS), Picture Archiving and Communication Systems (PACS), Teleradiology Systems, and Engineering Services at a fraction of the cost of larger competing solutions. RADinfo SYSTEMS develops and integrates DICOM- and HL7-compliant software with other modality and hardware products to deliver affordable solutions to hundreds of small and large healthcare providers worldwide. Professional services include software development, consultation, integration, installation and 24x7 technical support. Delivering Solutions that Meet Your Vision™ since 1993, RADinfo SYSTEMS headquarters are located in Dulles, VA and can be found on the web at www.RADinfoSYSTEMS.com.
